

Overview

IntelliPRINT Reporting

Rapid & Informed business decisions with Advanced Reporting INSIDE Notes & Domino!

Many businesses leverage the secure Lotus Notes & Domino application platform to enable collaborative applications. While the Lotus Notes framework enables users to collaborate on data and information presented in Notes views, enterprises are unable to quickly transform their Notes data into actionable information or make it available to business users without compromising the security & integrity of Notes data. The ability to visualize data is a key requirement for users to effectively take away information that their data is presenting. IntelliPRINT Reporting enables enterprises to overcome this key challenge by providing powerful native visualization capabilities and multiplies returns from existing investments in Notes & Domino applications & infrastructure.

IntelliPRINT Reporting is a native reporting solution for Notes & Domino that provides users with advanced, real-time reporting and data visualization capabilities. It integrates data visualization into the business context and workflow of Notes & Domino applications. IntelliPRINT Reporting provides advanced report design, distribution & viewing capabilities, extending the functionality of the Notes & Domino client by giving users the capability to work seamlessly with their e-mail, applications and reports INSIDE the Notes client! IntelliPRINT leverages Notes ACL definition and automatically enables users to view data based on their access rights.

IntelliPRINT Reporting components:

- **IntelliPRINT Reporting Designer (Desktop solution)** - Enables report designers to rapidly create and deploy standard and parameterized reports and charts for Lotus Notes Databases with real-time and parameterized data INSIDE the Lotus Notes client.
- **IntelliPRINT Reporting Viewer for Notes (Desktop solution)** - Allows business users to instantly view pre-defined reports and charts from specified Lotus Notes Views, as new tabs INSIDE the Lotus Notes client.
- **IntelliPRINT Reporting Viewer for Domino (Web-based solution)** - Enables web-based access to reports created using IntelliPRINT Reporting Designer and published to Domino applications.

Why choose IntelliPRINT Reporting?

Helps business users unlock the business value of Notes & Domino data

- Delivers an extensive array of industry-leading visualization capabilities
- Enables seamless report delivery to users within the context of their Notes & Domino application greatly enhancing usage efficiency and productivity

Significant productivity improvement for both business users & IT teams

- Easy-to-use & GUI-driven report creation enables rapid report creation
- Reduces report creation effort by up to 80%

Delivers the ability to leverage all native Notes capabilities, including ACLs

- Native to Notes - Leverages secure & collaborative Notes & Domino framework

Rapid & informed decisions for business users to meet dynamic business needs

- Rapidly transforms Notes data into actionable information

Attractive TCO & rapid ROI

- Minimal IT overhead, ease-of-deployment and ease-of-use ensures a low TCO and rapid ROI

Key Features

- **Native to Notes & Domino:** Available inside Lotus Notes & Domino and uses Notes APIs to retrieve data
- **Data Security & Integrity:** Inherits Notes ACLs and provides identity-based and document-level security in report data
- **Flexible Report Creation:** Allows report designers to create reports from Notes views, selected documents in a view, multiple views in a database and multiple Notes databases
- **Wizard-Based Report Creation:** Easy-to-use, wizard-based report creation
- **Enhanced WYSIWYG Report Design Interface:** Offers a drag-and-drop “What You See Is What you Get” (WYSIWYG) report creation interface
- **Multiple Report Types:** Allows report designers to create a wide range of reports including columnar, tabular, cross tab and custom reports.
- **Advanced Charting Component:** offers powerful data visualization capabilities with a wide range of charting options
- **Multi-level Cross-tab Reports:** Allows report designers to create multi-level cross tab reports with a user-friendly drag-and-drop cross-tab wizard
- **Data Filters:** Allows users to filter records at the dataset level, in design time and also offers an API to integrate scripting to support Run-time filters
- **Multi-value Grouping:** Enables report designers to group multiple values in columns as categories
- **Visual Query Builder:** Enables report designers to easily add columns and fields to the report using simple drag-and-drop and point-and-click operations
- **GUI-based linking of Views to create Linked Reports:** Enables report designers to create reports by linking multiple views without using Notes Formulae
- **Support for Formula Language:** Incorporates a new language expression providing an extensive function library, a powerful scripting engine, and an array of mathematical, logical & other operations
- **Reports based on ‘Full Text’ Search results:** Allows report designers to query a Notes database for every occurrence of a search string and use the search results for report generation
- **Report Deployment:** Offers an extremely easy-to-use report publishing mechanism
- **Report Scheduling & Distribution:** Enables report designers to generate reports on a scheduled basis with automatic distribution
- **Viewing Reports from Local replicas of the Database:** Allows users to connect to a local replica of the database and access reports even when not connected to the server
- **Export:** Allows users to export reports to a wide range of output formats including PDF, JPG, HTML, XLS, CSV, RTF, BMP, GIF and TIFF
- **ND8 Support:** ND8 compatible, leveraging Lotus Notes’ new functionalities

IntelliPRINT enabled us to standardize and improve the quality of reports that we deliver to our Lotus Domino application users. It is helping us greatly improve our decision-making through timely analysis of business processes.

Mihai Cristescu, Orange Romania

System Requirements

IntelliPRINT Reporting for Notes

Software

Operating System	Windows XP, Vista, 7 x32
Lotus Notes Client	6.x, 7.x, 8.x
Browser plug-in	Adobe Flash Plug-in 10.0 or above

Hardware

Processor	Intel Pentium or compatible x32
Hard Disk	100 MB
RAM	Minimum 1 GB

IntelliPRINT Reporting for Domino

Software

Operating System	Windows 2003 and 2008
Lotus Domino Server	6.x, 7.x, 8.x
Browser	Internet Explorer 7.x, 8.x, 9.x
Browser plug-in	Adobe Flash Plug-in 10.0 or above

Hardware

Processor	Quad Core or higher x32
Hard Disk Space	Minimum 100 MB
RAM	Minimum 4 GB

IntelliPRINT - Recent Awards

- 2008 Lotus Best Tool / Utility Award
- 2008 Lotus CTO Award Finalist
- 2007 Lotus CTO Award
- 2007 Lotus Advisor Award

GBS Highlights

- Over 5,000 customers and 4 million users in 80 countries
- Over 150 partners in 45 countries
- Offices in 15 locations across the US, Canada, UK, Germany, Bulgaria & India
- Offshore delivery center in Chennai, India
- Winner of over 50 IBM Lotus Awards
- 1 of 3 enterprises using Notes is a GBS customer
- 10 of the top 20 recognized 'Lotus experts' are GBS employees

GBS (GBSX) is a leader in Application Modernization Technology and Cloud Services, and is the world's leading provider of expertise for the IBM Lotus Notes/Domino platform. GBS helps customers understand and evaluate their current Lotus infrastructure and application environments, formulate strategic technology and operational goals, and implement solutions that meet current and future business needs.
