

IBM MaaS360: Mobile device management (MDM) solution

IBM MaaS360 provides the ability to enroll devices, remotely configure settings, manage email, Wi-Fi and VPN profiles.

You can also create and manage policies, and view inventory and compliance reporting.

With MaaS360 you can:

- ❖ Enforce passcode requirements and encryption
- ❖ Restrict jail broken and rooted devices
- ❖ Full and selectively wipe of devices
- ❖ Auto quarantine devices trying to access email
- ❖ Restrict corporate email from being moved
- ❖ Blacklist applications
- ❖ Restrict native apps and features on the device
- ❖ Enforce app compliance
- ❖ Authenticate user access to apps and docs
- ❖ Control edit, share, cut and past of docs
- ❖ Define URL filters and security policies based on categories
- ❖ Allow access to data on corporate intranet sites
- ❖ Use certificate based access to email, VPN and WiFi

“Powerful mobility management”

IBM MaaS360 can help you ensure data is not compromised while giving employees access to the information and resources they need.

Mobile Security is top of mind for IT departments.
